

SVJCT's Walawalkar Hospital

School Dental Health Project

B.K.L Walawalkar Hospital

*Transforming lives...
One at a time!*

INTRODUCTION:

- School going children constitute an important fraction of the total population. School children are also having tremendous latent potential as future human resource of any country.
- The health issues associated with school children are unique and need special interventions. Oral hygiene is often poor which leads to dental caries and a host of other oral and dental problems. Many children have Ear, Nose and Throat infections, which can be treated with antibiotics and ensuring clean environmental conditions.
- Nutritional status in school children also needs attention and many of them require nutritional supplementation.
- Keeping in mind the above challenges B.K.L Walawalkar Hospital proposed to hold a School Health Check-up cum treatment camp with special emphasis on oral and dental hygiene. This camp were held on periodic basis for school children so that adequate follow-up and monitoring can be maintained.
