Incredible Service !!

Credible and affordable life care

“ Had there been no difficulties and no thorns in the way, then man have been in the primitive state and no progress made in civilization and mental culture ”

Dr. Anandibai Joshi

31 march 1865 – 26 february 1887

Women's Medical College of Pennsylvania (WMC) in 1886.

First Indian lady doctor.

“ Cure it. God gives us the mean. We clean the wounds and God heals them. ”

Dr. Ida Scudder

9 Dec. 1870 - 24 May 1960

Founder, Christian Medical College & Hospital, Vellore

Proud to Follow 'Sadaguru' !

Shree Kaka Maharaj

It's more than a decade now since a team of committed medical professionals from the United Kingdom (UK) began their annual visits to BKL Walawalkar Hospital at Dervan. Under the leadership of Dr. Sanjay Deshpande, the team – a mix of specialist doctors and medical support staff- offers its services, for the benefit of the patients. The success of their mission can be seen in the ever-growing numbers of patients who get registered to avail the expertise being offered. The hospital is proud of the fact that this initiative has seen several team members returning to serve on subsequent visits. It is surely a sign that the hospital is on the path of working towards the goal envisioned by Shree Sahajanand Saraswati Swami Samarth Maharaj, that of providing Health Services to the underprivileged sections of the society.

Will carry forward the Legacy !

Disclaimer :

This publication does not purport to be a scientific journal in the classical sense. It is more in the nature of a vehicle for health professionals working at an unusual. If not unique, health and medical rigour. Nevertheless it serves an important purpose for people working in challenging circumstances as well as others who work in a more fortunate environment. The hospital spreads awareness of preventive health, is an educational hub and serves as a primary, secondary and tertiary medical care centre in a remote rural area.

For the Betterment of Mankind...

A progressive society addresses its need for betterment in different ways. In such a society, one would find institutions for improving the quality of life of the under-privileged through social services in remote areas of Konkan and also institution to make its citizen a better human beings.

However very rarely one would find these objectives being achieved through the same institutions, the reason being their lack of connect as commonly perceived.

At Dervan, ShreeVithalrao Joshi Charities Trust have been successfully running programmes for last 40 years to achieve these objectives of the betterment of the life for the under-privileged people through social services and imparting humanitarian values to the people. This success has been achieved based on the thought espoused by ShreeVithalrao Joshi, the founder of the trust. He has expressed his views clearly in an article in Marathi titled *"For the benefit of the mankind"*. He says humanitarian values need to be imbibed by everybody in the society, if society is to achieve peace and prosperity. He further elaborates that since the government or ruling power usually won't be in a position to impart humanitarian values to the large population, the same has to be done by a dedicated social organization. However with a natural human tendency for material advancement any insistence on the imparting of humanitarian values won't find resonance till the recipients are well placed in their daily life. Hence, an organization is needed which

would address these interdependent objectives with the same dexterity. Exactly such organizations were built by ShreeVithalrao Joshi. ShreeVithalrao Joshi Charities Trust has been active in the Dervan area for the last 40 years. Their work so far has been related to running programs for under-privileged on the following points...

Improving the daily life of people

- Work for all scheme for providing employment to local population.
- Distribution of free blankets.
- Subsidized ration during festival time.
- Free drinking water for area in and around Dervan during summer.
- Development of infrastructure at Dervan and nearby villages.
- Creating health awareness and hygiene in community and make available modern medical facilities for them.
- State-of-the-art medical treatment at reasonable rates for the masses through B.K.L. Walawalkar Hospital.
- Create awareness and offer assistance to common people regarding improved techniques in agriculture, planting.
- Make available maximum educational facilities to people in and around Dervan.

Making better human beings

- School with English as the medium of education and emphasis on all-round personality development.
- State of Art Sports complex having Olympic standards sports facilities like running track, gymnastic hall, shooting range, swimming pool, football ground to name a few which would help to develop international athletes from India.
- Programme to eradicate malnutrition among young children and pregnant/ lactating mothers by providing them nutritious elements on a regular basis.
- Medical College for education, research and training for upliftment of people need from remote rural area of Konkan as education can improve the lives of under-privileged people.
- The trust thus believes in tailoring the programs to meet the societal needs from time to time in relation to the basic philosophy elucidated by ShreeVithalrao Joshi.

Humble efforts to serve the needy !

Spiritual Power attracts UK Team to come here

Dr. Suvarna N. Patil

M.D. (Medicine), Medical Director

It is a pleasurable moment for me to say that team UK and team Walawalkar together has offered their best services to rural people during last week. This partnership is going to go a long way. Enthusiastic and generous team from UK is always been a source of inspiration to all of us, and we always look forward to your visit every year.

As a part of its social responsibilities, B.K.L. Walawalkar Hospital regularly organizes and participates in several activities aimed at the uplift of society. The team members envision, and strive toward, a world where the society is fully able to realize their rights, healthcare, navigate challenges and access opportunities during the transition from childhood to adulthood and beyond. As a part of it, every year we organize this 'Surgery week' where hundreds of patients receiving newer treatment and true exchange of knowledge, education and technique within short span of time at B.K.L. Walawalkar Hospital, Dervan.

The problems of our society are complex. Unfortunately, we have a large population, which are illiterate, unemployed and poverty stricken. While there has been progress all around, the provision of basic Medical treatment at affordable costs to our masses, still appears to be a distant dream. Nevertheless in this part of our country we have initiated our humble effort for awareness, detection and treatment under one roof.

Shri Digambar Das Maharaj believed in worshipping GOD by serving the poor and needy to the best of one's ability. Today in this holy place we have a modern hospital, perhaps the only well equipped hospital on the Mumbai-Goa national highway almost at its mid point between Mumbai and Goa. All modern medical facilities are provided here and that too highly subsidized rates.

In order to facilitate knowledge and technological exchange between developed countries and developing nations an

International C.M.E, titled "International Multidisciplinary Multispecialty CME" was organized during the camp period. This was accredited by Maharashtra Medical Council. This CME was attended by a total more than 100 delegates and general practitioners from nearby villages. The Quality of this International C.M.E was highly appreciated by all.

The training programmes for nursing staff and students had been arranged during this period which will develop Knowledge, skills and competence and it will be assessed through learning in the clinical setting. The motivational as well as academic lectures by UK team members will boost the confidence and knowledge power of the medical students.

In many ways, education can close our biggest development gaps. Improved education carries benefits throughout life and across generations. It has positive impacts on reducing infant and maternal mortality; it leads to better nutrition; supports disease prevention; boosts poverty reduction and empowers women and youth.

I am very proud to be part of such a wonderful programme that is investing so much in the future of people. Thank you to everyone who has contributed to making this 'Surgery week' a reality, our doctors, nurses, and extended support team from UK.

All these UK Doctors are coming here; every year with lots of enthusiasm, with a mission to serve the rural masses at a distant place from their homes. It seems to be a dream, magic, its like some Spiritual, Divine power attracts them to come and serve for the poor people around.

Welcoming The UK Team

Shri Kaka Maharj and Vikas Walawalkar Welcomes the UK Team.

Dr. Sudhir Joshi welcomes Dr. Shankar Kashyap

Patients are the real winners!

Affordable, Qualitative and credible Medical Treatment at Walawalkar Hospital, Dervan

Dr. Netaji Patil

A surgical camp by UK doctors and resident doctors was organized at B. K.L. Walawalkar Hospital, Dervan from 30th January 2016 to 5th February 2016. In this mega camp, total 161 surgeries were conducted out of which 23 were General surgeries, 20 Plastic surgeries, 23 Uro surgeries, 26 orthopedic, 8 ENT, 3 Gynaec and 58 ophthalmic surgeries. The patients registered were from different parts of Maharashtra. This operative camp was a unique camp in respect of affordability, qualitative and credible medical treatment. A never been heard such type of operative camp organized in any part of Maharashtra or India in last few decades. The Reasons behind this statement are multiple facets of the camp.

A notable feature of the Surgery week strategy is its emphasis on values and principles: key concepts are patient oriented approach, disease oriented treatment, credibility, affordability and an outcome-oriented approach.

In B.K.L. Walawalkar Hospital, you will receive, to the extent you are eligible, prompt and appropriate treatment for physical or emotional disorders or disabilities, in the least restrictive environment necessary for that treatment, free from unnecessary or excessive medication.

The patient once registered; receive information about the costs associated with your care, if any, before they are treated and at every stage of treatment. Thus no additional costs are borne from patients for unnecessary treatment.

One can easily notice that the patient confidence level was high throughout the camp period. This is because of quality of service we offer to the patients during their stay at BKLWH. The patients are treated with dignity, compassion and respect as an individual. Their privacy is totally protected and receive care in a safe environment. We seek to honour individual's personal and religious values.

The patient and their relatives were given freedom to know the current condition, medicines and medical history. Also, patients ask questions when they don't understand something about their care. Being involved is very important for patient to get the best possible results.

The patients themselves were involved in all decisions about the care, treatment. The patients were given information about the benefits and risks of treatment and other options. They can agree to or refuse treatment. The patient was told what is likely to happen to you if you refuse treatment. Refusing treatment will not affect your rights to future care, but you take responsibility for the possible results to your health. So patient and their relatives had homely feelings throughout the treatment and care.

Everybody involved in this mission acted with high moral principle, adhered to the highest professional standards and maintained the trust and confidence of all with whom they engaged through health services or education.

British medicos and our hospital consultants worked together diligently to serve patients and other beneficiaries like education/training to students, staff, driven by an earnest belief in a great mission fulfilling their individual responsibilities and organizational responsibilities. It was a true transfer of skill and techniques within. This was their consecutive 11th visit to our hospital and every time we experience and admire their punctuality and dedication towards work.

Most of the joint replacements performed were unicondular. Some revision joint replacements were also performed during this camp. The passionate and dashing orthopedics team consisting of specialists, namely Dr. Shankar Kashayp (U.K.), Dr. Sudhir Joshi, Dr. Sunil Nadkarni and Dr. Pavan Kohli performed all the orthopedic surgeries. The patients are lucky to get the services from such renowned personalities from healthcare industry. I would say all the orthopedic patients are really lucky to have such operating surgeons for their surgeries and care.

The hospital believes in "Treat all those I serve and with whom I work with dignity and respect. Show respect to earn it." We strive for the highest quality and continuous improvement by thoughtful and decisive in leadership, hard work, accountability for actions, willing to admit mistakes, and rigorous in correcting them. Perhaps all these

qualities and it's like a divine, spiritual power attracts British medicos to come every year and serve for poor people in this region.

The surgery week was an extraordinary event for all of us and a 'model' for those who wants to participate or

organize such type of activities. In order to provide a safe treatment environment for all patients or residents and staff, a social interaction, religious worship and spiritual support is required which one can experience here at B.K.L. Walawalkar Hospital, Dervan.

From bottom of heart --- If any one asks me what is the difference between these surgeries at dervan and surgeries done in mega cities like pune and Mumbai, I will say there are many differences. Our operation theaters are modular operation theaters,. All OT's are of ISO 5 grade and fully equipped with equipments and instruments. In mega cities you can not get guarantee of what were charges you pay, you may or may not get quality treatment. In mega cities

you are not sure that you will get quality treatment, for the money which you paid. In dervan all patients were very much satisfied and they get excellent quality of treatment for what they paid. They get exactly what they required. From the options of surgeries exact required surgery for the patient were performed. It was not the doctor decided according to his skill and excellency in operative skill.

Upliftment of the poor !

Service, Skill and Sustainability!!

Dr. Pavankumar Kohli

M.S, D.N.B, M.N.A.M.S (ORTH)

Fellow Joint Replacement & Sports Medicine

To write on the UK camp in BKLW Hospital, one must include these three words. Service, Skill and Sustainability.

Service : Service to mankind is the motto of BKLW Hospital & Trust. Doctors, Nurses, Educators, from UK & India have joined this mission with full gusto & spirit since past 11 years.

Skill : Skill that is shared increase the trust amongst us. That is the Law. To bring the latest techniques from abroad for use of patients from India has been the efforts. Team BKLWH & visiting England doctors. This includes endoscopic techniques, small incision surgeries & similar latest. Low morbidity surgeries that disrupt minimum normal tissue & aid quickest recovery.

Sustainable : It is no mean task to do a service task for one year, let alone eleven in continuity. The organization of the UK camp starts well before six months of the camp date.

Registration of patients, Education, volunteer lists, material lists both in Dervan & Newcastle, Activity lists, Logistics, Operation Theater lists, activity goes on in a controlled manner. But hectic pace till the last moment.

Still the inner feeling remains...we are not the real doers!! Actually all is being done through us. We are given this Blessings, a chance to be part of this grand event. And there is a Thankfulness of having been part of this learning & service experience. Even when the time comes for the patients to depart or to part from our friends of UK. And we have already started preparations & discussions for UK camp 12 th year in 2017.

Salutations to the Spirit, Saints & Sadgurus of Shree Kshetra Dervan that inspires this level of Sustainable Service & Skill year after year.

Poem for the Surgical Camp

*For the last couple of years,
Walking had been difficult .
But I couldn't decide on a surgery,
As the symptoms never fitted into drudgery.
My activities were getting restricted
But to be or not to be was the irony.*

*It was Dr. Kohli's and Dr. Nadkarni's push
and kakamaharaj's wisdom ,
That made me come to Dervan
As Dr Shankar Kashyap's victim.*

*The whole process from there on
Moving into Preop,Op and meeting the
anaesthetist was bang on !
The post Op first day was a nightmare
And the next day there was pain I couldn't bear.
As I developed some other issues,
Madam Suvarna Patil handled calmly the blues.
And here I am progressing daily,
To leave for home shortly.*

*I must thank the team of UK doctors
Especially Dr. Deshpande and Dr. Kashyap,
For this kind of dedication,commitment and
enthusiasm.*

*Thanks to all the sisters and doctors,
Maushis, wardboys for their rigorous hard work.
A specially mention of OT sister Jadhav,
sister Sagvekar,sisters Vilam ,prajakta
Physiotherapists meghna and Aditya.
Real pearls in the ocean.*

*Not enough words I have to say about
Dr Netaji Patil, Dr Survarna Patil and their team,
For making this place a home away from home for me.*

*Truly this institute is a divine place
Blessed by the inputs of kakamaharaj and
Mr Vikas Walavalkar.
Wishing they continue to serve the community in such
a way,
So 'shat' 'shat' Namaskar.*

Ortho Surgery

Story of 14 years and 7 operations

Appropriate treatment at the appropriate cost!!

Vinayak Dhere

The story of pallavi gharat is very interesting. She is patient of walawalkar hospital from 2006. She was brought in when she was mere a nine months old baby. Since then she had seven surgeries in walawalkar hospital. Her father is small businessman resides in alibaugh. For last 14 years he brings his daughter to walawalkar hospital only because of the quality, credible and compassionate treatment they get here.

Pallavi's father speaks so humbly about the hospital, doctors and the staff. He says, "aamchyavar ya hospitalche lai mothe upkar aahet!! Alibaugh, panvel, Mumbaia khup hospital aahet pan Ya hospitalshivay aamhi kothe jauch shakat nahi !" (we are very obliged for the service rendered by this hospital. There are many hospital in Alibaugh, Panvel and Mumbai but my family does not even think of getting treatment else where) these 'few' words speaks volumes about selfless service by the doctors and the hospital.

Pallavi mother couldn't hold her tears while talking to us. She said, "aamchya muliche jivan yani sudharle. Maze sarvana namaskar aahet !" (the hospital doctors improved the life of my daughter. I pray for those who cares for her) Earlier surgeries were done by Dr. Shailesh Barodia and others. Pallavi, a good singer! After successful seventh surgery done by dr. uday bhat her joys know no bounds !!

Almost all the patients have the same story of compassionate treatment here in Walawalkar hospital. Akshata Whalkar had a face and hand burn scar. She went through plastic surgery. She said, (mala lai changli vagnuk milali. Doctorani mala sagle samjaun sangitle.) I could get very good treatment here. Doctors spoke with me at length about my trouble and suggested the solution.

Supriya Shinde (Morvane, tal. Chiplun) and Satish Patil (Kolhapur) shares the same experiences. Kausalya Kuchekar (45, atpadi, sangli) gone through l5s1 endoscopic Desectomy. Her husband works in Indian Railways. He says, "doctors do not ignore the patients. They have a keen relations with the patients. This is the BEST thing in this hospital.

Mrs. Surekha Sanjay Gupte (59, pune) had both knee replacement surgeries. She is disciple of Shri Maharaj. Her two words (Maharajanchi krupa) blessings of Shri Maharaj!! Speaks volumes. Her son Rohan brought her in Walawalkar hospital with the same spirit of BHAKTI. He shared some strange experiences in some of the Pune hospitals. He says, "they spoke of the packages first and then about the patient. And packages also varied from hospital to hospital for the same surgery and same treatment. Here in Walawalkar hospital we got the appropriate treatment at the appropriate cost !"

In Their Life...!

UK Team visit to Kosomb Village for adolescent girls awareness programme. (Tal. Sangmeshwar, Dist. Ratnagiri)

UK Team Visits 'Bachat Gat' in Kudap Village.

Dohale Jevan (Baby Shower Ceremony)

Dohal Jevan is an ancient Hindu tradition which is beneficial for inculcating good sanskar (Values) in the baby while it is in the mother's womb. It also fulfills the good desires of mothers thus making them happy and healthy.

UK team participated in Baby Shower Ceremony conducted by community health department of B.K.L. Walawalkar Hospital. 30 expectant mothers (pregnant women) registered in hospital for delivery from different villages came for ceremony. Dr. Kalpana Patil and Dr. Kiran Chitale, Dr. Ailsa Dunphy and Rebecca Vallins actively participated and guided them regarding pregnancy and ante-natal care. All of them have enjoyed traditional dances arranged specially for pregnant women.

UK Medicos in Baby Showers Ceremony

Common Birthdays and Postnatal Mothers Workshops

The important objective of this function is to ensure follow-up of all children born in Walawalkar Hospital till they reach 2 years of age. This birthday ceremony was arranged by Community health department in Walawalkar Hospital for children of 6 month to 2 years. 25 children along with their mothers were participated in ceremony. It was arranged with view to guide mothers regarding weaning, diet and monitoring growth and development of toddlers. U.K. Team members along with Dr. Ranee Limaye, Padiatrician interacted with mothers gave blessings to toddlers. All members of UK team enjoyed the function.

Heart Speaks

Dr. Sanjay Deshpande
Anesthesia

We the UK team feel a change at both sides. The improvement speed and level of the Walawalkar staff is marvelous. It is certainly heading towards sophistication. Over the last 10 years it is a learning process for us also. We feel sharp difference in ourselves.

Now I do not call the people to invite to come here in Dervan. They call me and wish to come here. Drastic change we could feel but there is need to synchronize the resources.

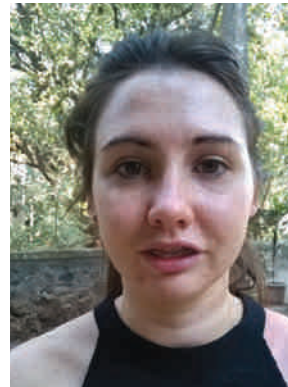

Lance Cope
Interventional Radiologist

This is my ninth visit to the Trust and it is now a way of life and on experience we eagerly look forward to.

The purpose made in short time is only struggling and so rewarding to me. The level of love is such of a high standard.

Training nurses and now starting Medical College. Is a wonderful development which will greatly enhance the Trust and allow the whole community and patients. Thank you so much for your hospitality enthusiasm, kindness and friendship.

Emma Docherty
Surgery

I am Very impressed with the medical school facilities both academic and extra curricular activities. The enthusiasm of the students is very impressive and they have such an inspirational model in Dr. Mrs. Suvarna Patil they will succeed in their mission through timeless efforts.

John Wall
Biomedical Engineer

This year's visit to Walawalkar Hospital has reinforced the importance of vision and leadership in successful development of services.

The expansion rate of health care services in this rural area is outstanding. While continuing to develop and change the staff remain positive and friendly and very helpful. There is a deep sense of shared community and shared purpose that supports great achievement.

The support staff are incredible. Without Shashi and Nandan, this trip would be very difficult.

Vish Bhattacharya

Surgery

It was a fantastic trip once again. The warmth and hospitality of the staff and the patients was fabulous. We were showered with Love, affection and care by each and every member of staff.

It was incredulous to see the rapid progress made in the last 2 years. The new medical school and sports complex with first batch medical students has wonderful to behold.

Wish you even more prosperity and may you flourish.

Dr. Sudhanshu Chitale

Urology

Service before self delivered by selfless, dedicated team of hard working, unassuming people for the betterment of fellow human.

Work culture at dervan is unique & unparalleled under the humble leadership of respected shri Kaka maharaj & shri Vikas Walawalkar.

There is a genuineness of belonging in the air. everyone feels this place belongs to him/her & are pretend to be a part of this 'heaven on the earth'!!

I have been fortunate to be a part of it. I feel blessed & privileged to be accepted as a member of the amarimay dervan family.

Prof. Stephen Atlwood

Surgery

It is great to see the expanding facilities at Walawalkar hospital and Research Centre. particularly the new Rural Medical College. The students are very enthusiastic and their contribution to the hospital. The UK Medical team will enjoy helping to provide teaching and clinical support to this future development.

Davy Wales

Anaesthetics

I have been involved with this project for 10 years not only visiting the hospital but also as a trustee of our UK charity raising funds to send equipment and staff every year.

The development of the hospital with a new structure is absolutely outstanding and so much better working conditions.

There is a need for this project to continue year after year to help advise the hospital staff on good practice and up to date procedures. It is particularly rewarding to not only see regular team members but also new staff visiting for the first time and their personal involvement with development of staff in future.

The hospitality we receive is outstanding as is the wonderful food prepared everyday particularly would like to thank my Brothers Shashi and Nandan who make sure we are safe from Arrival or Departure.

I am looking forward to returning next year to see the fruits of my labours.

Eleanor Freeman

Sr. General surgery

This is my 10th year of the camp and the achievements are once again outstanding. The welcome we receive each year is heart warmly. The new medical course is a tremendous step forward. The hospital continues to be growing in accordance with the need of the people of all strata.

I look forward to each year when I return to my second home and meet up with my India family.

Peter Taysum

Anesthetics

Thank you very much for this invitation to spend time with you and to share our knowledge with each others.

I felt very overwhelmed by both visiting to the hospital and my specialty of anesthetics and for the gwa cel the temple staff. I enjoyed the visit to the temple. In fact is a special gift for me.

I hope to return and continue this wonderful relationship that has been established among ourselves to grow.

Krishna Patil

Robotic Urosurgeon

Miraculous development at Dervan continues at unbelievable speed & confirms the divine blessing & presence of Sadguru Sahajanand Saraswati Maharaj, through the incarnation in the form of Shree Kaka Maharaj. The mission of "Health for all" is taking shape in the speed of light. Everyone here is working towards that goal with the hard work with the smiling face. The beginning of medical college in last August has come at the right time to show the rest of the educational bodies how to run an ideal academic institute to create future pillars of our country.

"Work is worship, reward of good word is to have done it." This is my take home message, can't wait to come back soon!

Pravin Meneze

Urology

It is always a pleasure to come to Dervan. I consider it as my annual pilgrimage. The urology work now needs to be taken up to the next level of training & standardization of equipments. With the help of biomedical engineers, this should have be possible. I am enthusiastic about the medical students and can see a bright future for each of them and for the in association.

I must thank the management of the volunteers for looking after us and making the urology & plastic surgery team feel welcome.

Kalpana Patil

Pediatric urology

This is my third year in Dervan. Each year has been very different in many ways but remarkable programme has been visible each time.

This year of course the medical college is populated with the first batch of budding young future doctor and talking with them was a rich experience and enjoyable interaction.

The amazing thing about this January trip is that in a selfish way sets up a standard for the calendar year by bringing me and I am sure all members of UK team in a holistic way.

I look forward to meeting all the people from Dervan (local) team and patients as they are very special I made you feel special.

My last three birth days were celebrated here as this is my "Maher"

All the staff went extra mile to make us feel at home. This is a dark big hole (from universe) attract everyone but certainly we (Krishna and I) have been sucked into this 'black hole' and WISH TO REMAIN HERE.

Lawa Kennedy

Opd

The Staff of Walawalkar Hospital and Medical College is very good and consistant in performing their duties. Food served to us was very tasty. Very friendly approach by volunteers inspired us while working. We have been well looked after.

Leticia Dujardin

Ophthalmology

Gratitude is the first word that comes to my mind when I think about the whole experience in dervan Walawalkar hospital and medical college. I am so grateful to have participated in this project at so many levels –surgical skills, teaching, team work, communication. it only I have been able to pass on a small part of the warmth and support I recieved! It has fulfilled a childhood dream (that of being involved in an international coopeahim) that has turned out to be beyond any expectations. Again thank you so much to all of you involved in this camp! Big hug and Namaskar!!

kathlear yats

Ophthalmology

I am back to Walawalkar hospital for the 4th time & love it. Everyone is so welcoming.

The new developments & expansion in the area has introduced changes to the lives of the communities' healthcare. There smiles appreciations speak volumes + everyone involved in these developments should proud of what has been achieved. It puts Walawalkar's hospital a name to be and Dervan on the map of health care the staff I worked with are special, we share on information, laugh, mistake & learn from that. They are keen to learn, be involved to do. The communication is the key knowing a good service in delivered to patients increase job satisfactions and self esteem. Thank you to all for looking after us so well. The food was excellent I hope to see you all next year. till then Take care !!

Peter Crhistine

Anaesthesia + Recovery

This was my second time in Dervan and I enjoyed it as much as the first one. Dervan is an amazing place with an indescribable atmosphere.

The people are what make it so special, each and every person makes us feel so very welcome and then work tirelessly to make the UK camp a success.

Thank you everyone !

Shankar Kashyap

Orthopedic

It has been a 'forever' week for me. very impressed by the dedication and selfless service provided by everyone in the centre.

I have to show my appreciation to many those who looked after our daily needs. The food was outstanding.

The theatre staff was very sensitive. We all enjoyed our stay here in Dervan.

Heidi Morgan

Opd anaesthetics

Amazing food

Attentiveness of Nandan + Shashi outstanding

Cold water available when requested !

Thanks

Michelle Hunter

Critical Care

Another great year, such a friendly staff I fully enjoy working across all ICU's. it is great to see the confident intersection between the nursing and medical staff. The nursing Staff have grown in skills, knowledge and ability. The student nurses English has improved and they are able to answer the question. But there is need to know that they have the knowledge they just need to put this in to practice in the wards. Communication with patients is the key.

Community projects are outstanding.

Hope to see you again soon.

Medical Mission by British Medicos 2016 had been a great learning opportunity for Medical College Students as well as Nursing College Students. They participated in the lectures & presentations over whelmingly.

Prof. Lans Cope

Michelle Hunter

I would like to take this opportunity to thank the entire British Medical team that has graced the halls of this college and hospital with the is presence. We really enjoyed the lecture series presented by you enriching us with knowledge from your vast plethora of experiences. At the same time we sincerely hope you enjoyed your stay here. As many of you mentioned. You were awed by the culture and the hospitality extended to you. allow me to take this opportunity to welcome you with open arms into our hospital family. Last but not the least, and I speak for every student here, we will eagerly await your next year and hopefully every year henceforth !

- Mohit Bhagia

Honorable dignitaries, professors, non-teaching staff, doctors, hospital security & my fellow mate I miss Surabhi Ziradkar studying at this institute, in 1st year MBBS I'm privileged to have been asked to share my experience on this occasion on behalf of all the student.

A seven day event cannot happen overnight the wheels start rolling week ago. It requires planning and a bird eye for detail and so I express my gratitude towards Dr. Sanjay Deshpande and the retired UK team you the is selfless and dedicated work for the betterment of our society. We enjoyed one to one interaction with Jon sir who showed us in simple way the strength of teamwork Dr. Stephan who made us realize the importance of understanding every aspect of anatomy & physiology for a better foundation. We were also motivated by the journey of Ms & Mrs Patil where Dr. Krishna Patil started with open surgeries and soon excelled in robotics. I must mention deep sense of appreciation towards Dr. Kiran & Dr. Shankar who addressed us with the is vibrant smile & great knowledge we were overwhelmed the British doctors efforts, to educate the adolescent girls and helping us to empower them. Last but not the least , I must mention that through we come from different countries and belong to different cultures but we had such friendly conversations with u like we know each other for decades. We will be eagerly waiting for your next visit.

- Surabhi Ziradkar
