Dear Friends,

Since its inception in 1992, the mission of ARSI has been to promote good affordable and reliable rural healthcare in the rural areas of our country. The aim of the Association was to have cooperation of other socio- health organizations, who have been delivering similar services, to share the knowledge of each other and to thereby upgrade the health management of the rural poor, to deliver indigenous and inexpensive methods to treat the diseases of those who are unable to take modern treatment due to their financial constraints. During the last two decades, ARSI has made a great achievement in this field.

The Association, which interacts with stalwarts from National & International, Developed & Developing countries, through such conferences, has always been able to march successfully and steadily towards our objectives. The present conference is being held in B.KL. Walawalkar Rural Medical College and Hospital, Sawarde, Tal. Chiplun, Dist. Ratnagiri, Maharashtra, India, which is having rural surroundings and a perfect natural environment to hold this conference.

We are confident that, the scientific exposition at this conference would be of highest order. This would prove a great opportunity for everyone, to share each other's views and observations and would also result in strengthening the existing friendships and to have acquaintances with newcomers. The theme of this conference is "TRAINING AND CREDENTIALING RURAL HEALTH CARE PERSONNEL", which is designed to advance our path towards rural health care with determination as per the goal, which has been cherished by us throughout these years. We hope this conference would be an unforgettable and memorable performance, which would be credited with academic, cultural and social deliberations.
